Art Unit: 3629

In response to applicant's argument that cited reference Eisenhart does not disclose providing business plans to the user and, moreover, providing business plans based on similarities to the business models of the other providers.

Applicant is arguing a limitation not positively claimed by the applicant.

In response to applicant's argument that cited reference Eisenhart does not disclose or suggest examining multiple items of the resource provider to certify the resource provider as being able to provide at least one selected from the group consisting of capital, land, building rental, management groups, rules and regulations, administrative ideas, and business plans.

However, applicant is arguing a limitation that the service provider has to provide more than one items, and, this limitation is not positively claimed by the applicant.

In response to applicant's argument that at no point does cited reference Eisenhart disclose how such submissions would enable the system to certify the ability of a resource provider to provide a particular resource.

However, Eisenhart teaches to verify qualifications of potential member (i.e. certifies).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 7, 11, 14 and 26 – 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eisenhart US Publication 2001/0047276.

Regarding claims 1 and 26, Eisenhart teaches system and method for efficiently matching resources required to establish businesses and business facilities through the Internet. Eisenhart teaches:

providing an electronic hub system configured to communicate with at least a-one resource provider [Fig. 3 and disclosure associated with Fig. 3];

communicatively coupling said resource provider with said electronic hub system [Fig. 1 and disclosure associated with Fig. 1];

examining a plurality of items of said resource provider to certify said resource provider as being able to provide at least one of capital, land building rental, management groups, rules and regulations, administrative ideas, and business plans;

Eisenhart does not explicitly teach resource provider as being able to provide from a group consisting of capital, land building rental, management groups, rules and regulations, administrative ideas, and business plans (i.e. limiting system and method to

be used within the specific group of items). However, Eisenhart teaches resource provider as being able to provide from a group consisting of at least capital;

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Eisenhart and expand the group by adding additional elements in the groups to make the system and method available to plurality of types of suppliers and requesters.

Eisenhart with the expansion of group teaches:

storing a record of said certified resource provider in said electronic hub system [Fig. 6, 7A and disclosure associated with Fig. 6, 7A]; and

matching said resource provider according to said record of said resource provider with other certified resource providers having a record saved in said electronic hub system [Fig. 7B and disclosure associated with Fig. 7B]

collecting and analyzing records of said certified resource providers factory [Fig. 7B and disclosure associated with Fig. 7B]; and

implementing matches and business plans for said certified resource provider based on similarities to business models of the other certified resource providers enable efficient obtainment of resources necessary for establishing a company or a factory [Fig. 7B and disclosure associated with Fig. 7B].

Regarding claim 2 and 27, Eisenhart teaches establishing an electronic contract for said resource provider [0090].

Art Unit: 3629

Regarding claim 3, Eisenhart teaches electronic hub system comprises an electronic hub and a data storage device [Fig. 2,3 and disclosure associated with Fig. 2, 3].

Regarding claim 4, Eisenhart teaches data storage device comprises a plurality of databases built therein (known to one of ordinary skill in the art that DBMS like Oracle, Sybase etc. allows users to create plurality of databases on the storage device upon which the DBMS is installed) [Fig. 6 and disclosure associated with Fig. 6].

Regarding claims 5 and 28, as responded to earlier in response to claim 4, Eisenhart teaches capability for database to comprise:

- a resource database and said record of said resource provider stored therein;
- a certified resource database having said record of said certified resource provider with said items;
- a business model database having a plurality of business models of enterprises;
- and
- a plan database having at least a business plan combining said record of said resource provider with said business models of enterprises.

Regarding claims 6 and 29, Eisenhart teaches:

defining a priority of said business plans according to similarities to said business models of said certified resource providers [0061];

Art Unit: 3629

saving said business plans in said electronic hub system [Fig. 7A and disclosure associated with Fig. 7A];

sending said business plans to said resource providers certified [Fig. 7D and disclosure associated with Fig. 7D]; and

displaying said business plans [claim 6].

Regarding claim 7, as responded to earlier, Eisenhart teaches capability wherein said resource provider comprises a capital provider.

Regarding claim 11, Eisenhart teaches capability wherein items comprises an official document related to said resource provider [0054].

Regarding claims 14 and 30, Eisenhart teaches:

logging in said electronic hub system [0012];

selecting a class for said resource provider [Registration Form, Fig. 7A and disclosure associated with Fig. 7A];

selecting a scope for said resource provider [Registration Form, Fig. 7A and disclosure associated with Fig. 7A];

assigning an identification number to said resource provider [Fig. 7A and disclosure associated with Fig. 7A]; and

saving said record of said resource provider in said electronic hub system [Fig. 7A and disclosure associated with Fig. 7A].
